DETAILED ACTION

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 32-40 have been renumbered claims 33-41.

The applicant should note that claim 32 as present reads in its entirety as follows:

32. A method of forming a hammock, the method with a diameter of (sic) from 0mm to 30mm (sic).

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 3673

Group I, claim(s) 1-15, drawn to warp knitted stretch fabric, classified in class 442, subclass 304.

Group II, claim(s) 16-38, drawn to a hammock, classified in class 5, subclass 122.

Group III, claim(s) 39-41, drawn to a method of printing or marking a hammock, classified in class 283, subclass 56.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I.

It is considered that a fabric for use in furniture formed in part at least from a synthetic material wherein the synthetic material is woven or knitted to provide a stretch characteristic of from 5% to 50%/0, comprises a "first special technical feature".

Group II.

It is considered that a spreading rod for a hammock or hammock chair formed as a flexible elongate member adapted to deform under load and to assume its undeformed configuration when not loaded comprises a "second special technical feature".

Group III.

It is considered that a method of printing various markings upon hammock as defined comprises a "third special technical feature".

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
